Profile Summary

I am a motivated and enthusiastic Computer Science graduate, currently building a strong foundation in software development. I am actively learning and applying skills in programming, problem-solving, and modern technologies through hands-on projects. I have a growing understanding of languages like JavaScript and Python, along with web development concepts. I am passionate about writing clean, efficient code and continuously improving my technical abilities. I enjoy exploring new tools, frameworks, and best practices in software engineering. I am eager to contribute, learn from experienced professionals, and grow as a Software Engineer in a dynamic environment.

Education

SRKR Engineering College(A), Bhimavaram	2025
Artificial Intelligence And Data Science	7/10

Technical Skills

Programming Skills:

- Python
- Java (Proficient)

Frontend Development:

- HTML5
- CSS3
- JavaScript

Backend & Databases:

- MySQL
- Django (Backend Development & REST Basics)

Frameworks & Libraries:

- React JS

Tools & Technologies:

- Git & GitHub
- VS Code

Soft Skills

- Effective Communication
- Team Collaboration
- Problem Solving & Analytical Thinking
- Attention to Detail
- Adaptability & Continuous Learning

Project

Deep Translator Web Application

- Developed a full-stack web application to translate text into multiple languages using external APIs
- Implemented backend logic using **Django** and handled API integration for real-time translation.

- Designed a responsive and user-friendly interface using **HTML, CSS, JavaScript**.
- Implemented clean request handling and dynamic content rendering.
- Improved understanding of **API integration and backend logic**.

Recipe Finder Web App

- Created a dynamic recipe search application using **JavaScript and Edamam API**.
- Implemented search functionality to fetch and display recipes based on user input.
- Designed an interactive UI with **HTML, CSS, Bootstrap**.
- Learned handling **asynchronous operations (fetch API)** and JSON data.

Django School Management System

- Developed a web-based system to manage student and teacher records efficiently.
- Implemented full **CRUD operations** using **Django and MySQL**.
- Designed and managed relational database schema using **Django ORM**.
- Focused on backend logic, data handling, and system organization.
